

Dinesh Behera

Senior Technical Consultant | Cloud, Platform & DevOps Engineer

Odisha, India | +91 90406 32014 | dineshdante.ds@gmail.com | dinudante.in

PROFESSIONAL SUMMARY

Cloud, platform and DevOps engineer with 5+ years of enterprise consulting experience across Red Hat OpenShift, Kubernetes, OpenStack, Linux, Windows Server, automation and observability. Hands-on in production troubleshooting, cluster health assessments, upgrade readiness, capacity analysis, backup validation, incident root cause analysis (RCA), controlled change execution and technical documentation. Experienced in customer-facing delivery and cross-functional coordination with application, network, security and OEM/vendor teams.

TECHNICAL SKILLS

Platforms & Cloud: Red Hat OpenShift, Kubernetes, OpenStack, AWS, Google Cloud Platform (GCP), VMware, Hyper-V, Docker, Podman, Helm

Automation & DevOps: Ansible, Ansible Automation Platform (AAP), AWX, Python, Bash, Terraform, Jenkins, CI/CD, GitOps, Git, GitHub, GitLab, Harbor (registry)

Systems & Observability: Red Hat Enterprise Linux (RHEL), Ubuntu, Windows Server, DNS, basic networking, Prometheus, Grafana, Zabbix

Operations & Documentation: SOP, MOP, RCA, operational audits, architecture diagrams, health and utilization reports, implementation and rollback plans

PROFESSIONAL EXPERIENCE

Senior Technical Consultant / Cloud, Platform & DevOps Engineer

Jan 2021 - Present

Prodevans Technologies | Bhubaneswar and client sites

- Deliver enterprise consulting across OpenShift/Kubernetes, OpenStack, Linux/Windows, automation, monitoring and DevOps environments.
- Perform cluster health checks, upgrade-readiness reviews, node and workload diagnostics, backup validation, capacity and utilization assessments, incident troubleshooting and post-change validation.
- Prepare SOPs, MOPs, RCAs, audit reports, implementation and rollback plans; coordinate delivery with OEM/vendor, application, network and security teams.
- Supported Odisha State Data Centre with OpenShift lifecycle planning, operator and node health review, upgrade prechecks, evidence workflows, OpenStack audits and multi-day infrastructure health reporting.
- Developed Ansible playbooks for execution, patching and audit workflows; automated AAP/AWX reporting for users, projects, job templates and execution analysis.
- Deployed Kubernetes on GCP, configured Anthos Service Mesh, onboarded applications, enabled autoscaling and executed load tests; automated AWS virtual-machine provisioning and GitLab configuration.

CEO / Lead Instructor, ProLEAP Academy Concurrent

Lead hands-on Python, DevOps and technical-documentation programs; design roadmaps, labs, capstones and live troubleshooting sessions.

Chief Business Officer, PDCloudEX Concurrent

Support cloud-platform positioning, customer and partner communication, solution enablement and technical-business coordination.

SELECTED TECHNICAL WORK

- **OpenShift upgrade readiness:** Assessed cluster conditions, operators, machine configuration pools, node health and upgrade paths; documented staged execution, maintenance, validation and rollback considerations.
- **OpenStack audit and utilization:** Collected project, compute, network and volume inventory through CLI and Horizon; converted operational evidence into decision-ready audit and utilization reports.
- **Automation and delivery:** Built Python and shell-based workflows, repeatable diagnostic collections and customer-facing implementation documentation with evidence-first validation.

EDUCATION

Bachelor of Technology (B.Tech), Mechanical Engineering
National Institute of Science & Technology, Berhampur | 2017–2021
